MARINE

Dear Colleagues,

CNR-ISMAR (<http://www.ismar.cnr.it/>) is looking for a highly motivated early career marine biogeochemical modeler to join our multidisciplinary research team based in ROME (Italy) in the framework of the EU Horizon 2020 project **Bridge-BS “Advancing Black Sea Research and Innovation to Co-Develop Blue Growth within Resilient Ecosystem”** (<http://bridgeblacksea.org>). The duration of the contract is initially for 1 year with possible extensions. Initial annual gross salary is 22K Euros. Position open until filled.

Research activities:

This successful candidate will work in close collaboration with the Liège University ([MAST](#) group) to develop and implement the N-cycle complexity in existing tri-dimensional coupled physical-biogeochemical model running in the Black Sea, for simulating Black Sea nitrogen budget under future climate scenarios.

Requirements for application:

- PhD in oceanography or related fields
- Experience with numerical modelling.
- Experience and interest to work in different fields of marine science including physics, biogeochemistry, ecological processes.
- Good knowledge of English is required.

If interested please contact:

- Angela Landolfi (angela.landolfi@cnr.it)
- Marilaure Grégoire (mgregoire@uliege.be)
